CAREER OBJECTIVE

A motivated B.Tech student in Artificial Intelligence and Machine Learning seeking an entry-level software or cloud role where I can apply my skills in Python, SQL, Azure, and Power BI while continuously learning and contributing to real-world projects.

EDUCATION

Bachelors of Technology (B.Tech) in Artificial Intelligence and Machine Learning - 72%
Annamacharya Institute of Technology & Sciences, Rajampet 2023-2026

Diploma in Electronics and Electrical Engineering (EEE) -82.66%
Diviseema Polytechnic, Avanigadda 2019-2023

Secondary School Certificate (10th Class) -85.5%
Zilla Parishad High School, Mopidevi 2018-2019

SKILLS

Technical Skills :

- **Programming Languages :** Python
- **Web Technologies :** HTML, CSS
- **Database :** SQL
- **Cloud Services :** Microsoft Azure (Blob Storage, Key Vault)

Soft Skills :

- Effective verbal and written communication skills
- Teamwork
- Time Management
- Quick Learner
- Adaptability

PROJECTS

1. **CardioDiagnose – Heart Disease Prediction System**
    - Developed a machine learning based application to predict cardiovascular disease risk using patient health data.
    - Implemented data preprocessing, feature handling, and model training using Python.
    - Built an interactive application with multiple modules including data analysis, visualization, and model evaluation.
    - Integrated visualization tools to interpret model predictions and health indicators.
2. **Azure Blob Storage – Static Website Hosting & Lifecycle Management**
    - Deployed a static website using Azure Blob Storage, improving load time by 30% and enabling seamless content delivery over 100 users.
    - Enabled public access and tested website delivery through Azure's endpoint.

- Implemented public access rules, tested endpoints, and verified deployment through Azure Portal.
- Gained hands-on experience in **Azure services, website hosting, and cloud optimization.**

3. **Azure Key Vault – Cryptographic Key & Secret Management**
    - Configured Azure Key Vault to securely store secrets and RSA cryptographic keys.
    - Generated a 2048-bit RSA key and managed secure passwords.
    - Implemented Role-Based Access Control (RBAC) for secure administration and audit readiness.
    - Developed a strong understanding of cloud security, key encryption, access control mechanisms.

WORKSHOPS

Advanced Data Science **Indo Euro Synchronization, APSSDC** (2024)

- Gained exposure to **MS Excel, Power BI,** and **Tableau** for data visualization and analysis along with practical experience in **Python for data processing.**

Edunet – IBM SkillBuild Foundation Skills Program(FSP) **APPSSDC** (2024-2025)

- Attended a college organized workshop conducted by IBM, covering foundational concepts of **Artificial Intelligence (AI)** and **Machine Learning (ML).**

CERTIFICATIONS

- Build Your Own Static Website **NxtWave** (2024)
- Build Your Own Responsive Website **NxtWave** (2024)
- Artificial Intelligence with Python **APSSDC** (2025)
- Cloud Computing **Embrizon** (2025)
- Advanced Data Science Internship **APSSDC (** 2024)
